PRODUCT FEATURES

Water-Based

Utilizes an eco-friendly formulation that reduces environmental impact

Biodegradable

Made from materials that break down naturally, enhancing sustainability

Shine Variability

Offers customizable shine levels to match your design needs

Breathability and Softness

Provides a comfortable, airy feel for enhanced wearability

Best in Class Durability

Resists tarnishing and maintains superior performance over time

Extensive Color Selection

Features a wide range of precise shades to perfectly match your specifications.

Zero Waste

Implements a production process with no waste, supporting environmental responsibility.

MultiPurpose

Ideal for t-shirt prints, coatings, all-over prints, and Indian clothing.

Versatile Printing Compatibility

Works with flat bed, rotary, and hand screen methods.

ZDHC Level 3 Compliant

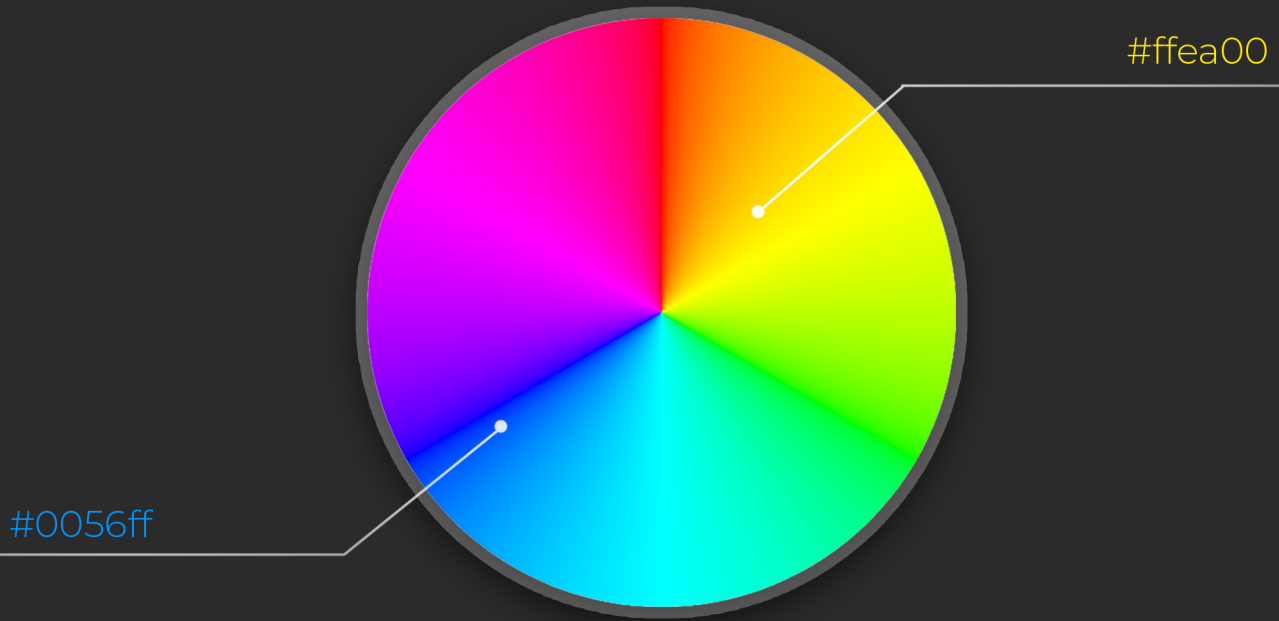

Adheres to stringent environmental and safety standards.

Explore More Variants

Discover additional options to fit your needs.

COLOR

The color wheel showcases our full range of shades, helping you select the perfect hue for your needs. With our advanced color-matching technology, we can create virtually any color and precisely match shades according to buyer preferences. Whether you need a specific hue or an exact shade, our state-of-the-art processes ensure that your colors are vibrant and consistent every time.

Lowshine

Highshine

SHINE VARIABILITY

The shine of our products can be tailored to your preferences, ranging from a subtle to a more pronounced, reflective finish. This flexibility allows you to choose the level of shine that best suits your needs. For a clearer understanding of these options, we recommend reviewing physical samples or detailed photographs.

COMPLIANCE

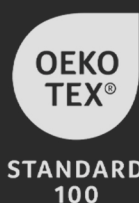

ZDHC (Zero Discharge of Hazardous Chemicals):

The ZDHC program works to eliminate hazardous chemicals from the textile and footwear value chain, promoting safer products and cleaner production. By meeting ZDHC Level 3 standards, Dyechem International reaffirms its dedication to sustainable manufacturing and environmental protection.

ISO Certifications:

ISO certifications set global standards for quality, safety, and efficiency. At Dyechem International, compliance with ISO standards reflects our commitment to excellence, ensuring our products and processes meet high international criteria for reliable, high-quality, and sustainable textile solutions.

OEKO Tex Eco-Passport

The Eco- Passport certification verifies that our dyes, pigments, and textile auxiliaries meet stringent environmental and safety standards, ensuring products are free from harmful substances and made with sustainable practices. This globally recognized certification highlights our commitment to eco-friendly, responsible manufacturing in the textile industry.
