

Paints for Glass by Dyechem

Transparent, metallic, opaque — elevate glass
from functional to phenomenal with
specialized surface finishes.

Dyechem 

Challenges With Painting Glass

Limited Finishes

Few transparent or metallic options exist.

Long Curing Times

Traditional paints require extended drying periods.

High VOC Emissions

Solvent-based systems harm the environment.

Poor Fixation

Peeling and adhesion problems are common.

Introducing Dyechem's Paints for Glass

Universal compatibility. Stunning results. World-standard performance.

Easy Spray Application

Simple to apply with standard equipment.

Multiple Finish Options

Available in transparent, metallic, glitter and opaque.

Easy Fixation

Quick drying with simple heat application.

Globally Certified

ZDHC Level 3 and ISO Certified processes.

Built for Real-World Performance

Water based and eco friendly

Seamless application using your current setup

Certified for export-grade quality and compliance

Technical support and shade/finish matching services included

Simple Process. Superior Output.

Spray Application

Apply directly onto clean glass surfaces with standard equipment.

Heat Drying

Use existing hot air, IR, or oven systems.

Works with your current factory processes.

Finished Product

Enjoy a smooth, durable finish that lasts.

From bottle to building glass — results you can rely on.
